00

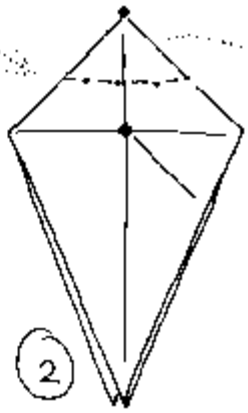

Start with a snugly-folded BIRD BASE.

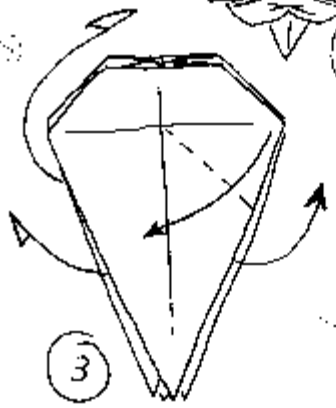

(A 10" square yields a 4¾" ornament.)

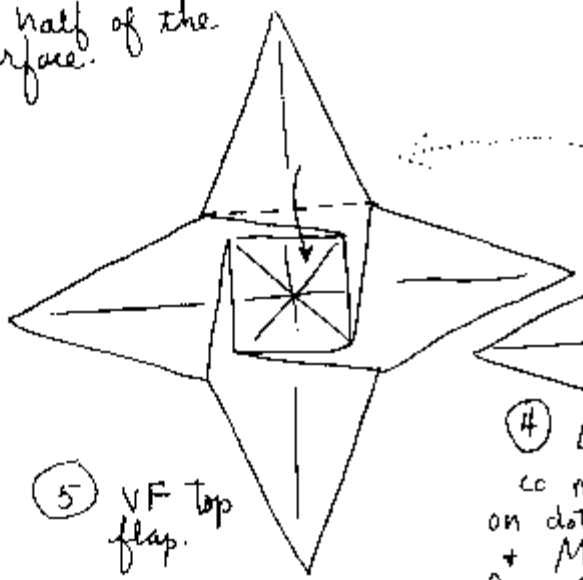

1 FUF corner to center line. Repeat behind and on inner layers, each time on the right half of the surface.

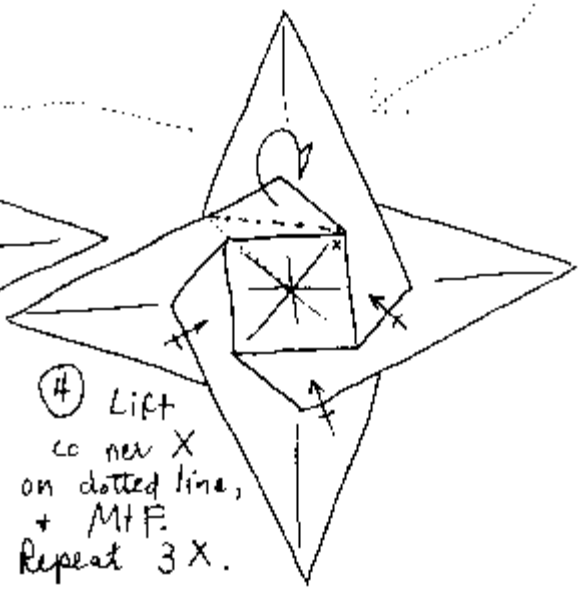

2 FUF peak to horizon, then sink on crease.

3 Fold flaps up on creases and arrange them in a cross, flattening the sunken center.

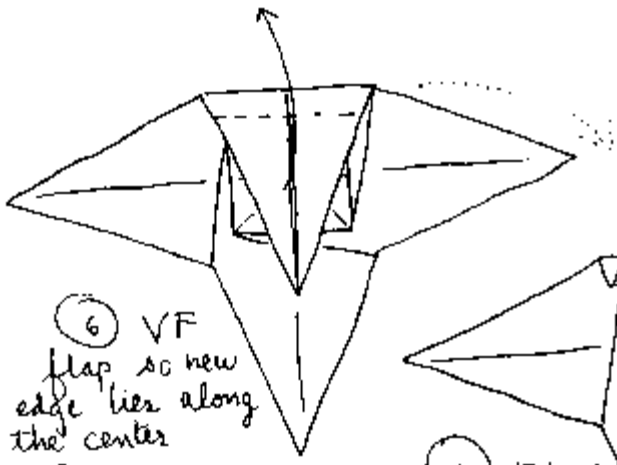

5 VF top flap.

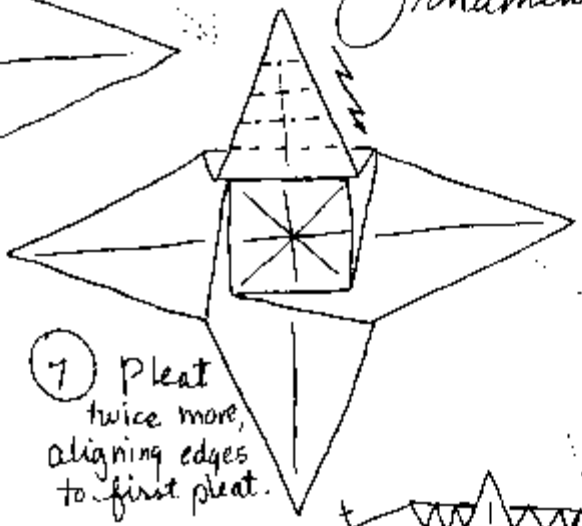

4 Lift corner X on dotted line, + MtF. Repeat 3 X.

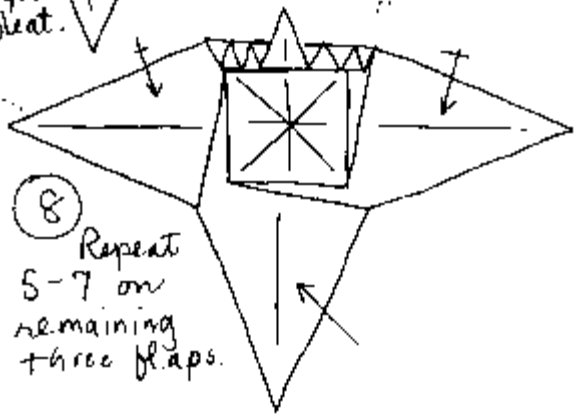

Star Twist Ornament, p2

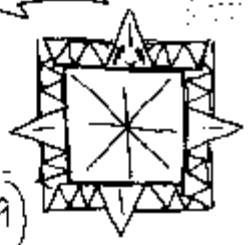

(6) VF flap so new edge lies along the center square.

(7) Pleat twice more, aligning edges to first pleat.

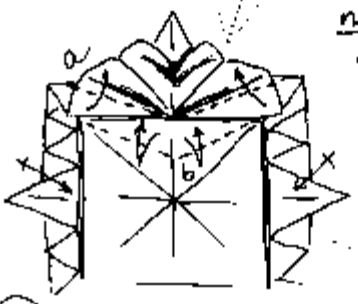

(8) Repeat 5-7 on remaining three flaps.

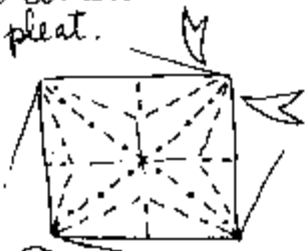

(9) VF - note that folds do not go to outer corners of pleat.

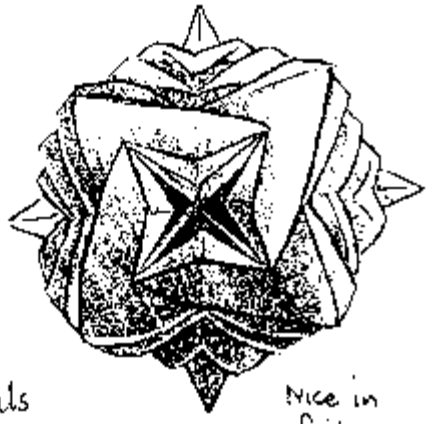

(10) Enlarged detail: VF next layer. Again, note that folds do not go to corners.

(11) a) VF next pleat, as before. Then repeat 9-11, 3 times.
b) FVF edges of central square to its diagonals, all around.

(12) Detail of center square: Invert the diagonals while pinching up each corner. These corners come forward in 3-D.

Nice in foil.
